Acoustics

The sound of silence

Vitalo Industries has extensive expertise with over 70 years experience in providing expert consultancy in noise and vibration reduction. Vitalo excels in providing solutions for absorption and transmission loss, noise insulation and noise reduction. Combined with vibration dampening, Vitalo Industries offers its customers excellent silencers for noisy machinery and superior sound absorption throughout a variety of operating environments.

Using a large array of materials and techniques, Vitalo Industries empowers its customer to **achieve superior acoustical performance**.

Vitalo Industries provides acoustic solutions for top-tier clients in the industrial vehicles **construction and machinery industry**. Its expertise in providing superior results for a variety of customer requirements, leads to **guaranteed long-term acoustic performance** for:

- » Engine and machinery insulations
- » Quiet cabin and operator environments
- » Interior covers and compression formed headliners for industrial vehicles and high-class buses

By combining the **most effective materials and processes** meeting all customer requirements, a virtually endless range of sound solutions can be offered.

Products include 3-dimensional compression formed fiber composites, 2-dimensional foam components and pre-laminated acoustical foam complexes. The closed-cell Quash® foam for water and humidity resistance is one of the many solutions that Vitalo Industries is able to provide to respond to each customer's stringent requirements. On top of high quality, all solutions offer impeccable looking, functional design, high sound absorption and easy assembly.

Looking for a total cost-saving solution? Vitalo Industries is more than happy to help you.
