## Plastic solutions for interior and exterior applications

Vitalo Industries is a leading plastics processor supplying high-tech parts and systems for heavy duty, agricultural and construction vehicles. Using the extensive know-how of its engineering department, it provides total solutions to some of the most highly regarded brands in the industrial vehicle industry, both for interior and exterior applications.

Vitalo Industries excels in applying the **best processes** for the **highest quality result** varying from single sheet and high-pressure thermoforming to twin-sheet and compression forming while using a minimum amount of tools.

Taking into account all aspects of quality, design, comfort and space, materials and processes are selected to **meet every aspect of the customer's requirements**. Typical examples include impact and chemical resistance, UV-protection, dimensional stability or surface quality, noise and heat insulation, etc.

- » Single sheet and twin-sheet roofs for agricultural and construction equipment
- » Interior trim solutions
- » High gloss exterior body panels and motor-hoods

Vitalo offers a **variety of solutions** such as interior trim panels, exterior body panels, roofs for agricultural tractors and construction machines, compression formed headliners and a lot more.

In close cooperation with the customer, Vitalo Industries offers a **complete supply chain**, delivering a range of products and assemblies ready for quick and easy mounting.

Vitalo Industries has established a **partnership** with a large array of **international customers** and is known in the industry for its **profound customer care**.

Looking for a total cost-saving solution?  
Vitalo Industries is more than happy to help you.
